

SCENTCOMMUNICATION

ScentDiffuser.wave

The SCENTCOMMUNICATION ScentDiffuser.wave is a professional standalone scent dispersing system for mid-size areas. Nearly any scent can be diffused using the micro-nebulization process. The pure fragrance or flavor is diffused without being heated in order to avoid any negative impact on the complexity and quality of the scent. The system transfers the fragrance / flavor from liquid into gas within the unit. There's no risk for contamination.

- complete transfer of liquid into scented air within the system
= dry scenting
- no heating
- no mist
- perfectly controllable
- long term scent quality
- low maintenance
- mobile system built into a stable case which allows usage in rough environments, at events, etc.

The Product:

The ScentDiffuser.wave is a stand-alone system. Due to micro-nebulization technology, the system delivers perfectly controlled scent impressions in areas of up to 250 sqm (~ 2700 square ft). The unit can be installed wherever needed. Replacement of cartridges depends on settings but is usually necessary every 3 to 6 weeks.

Applications:

Enhances the ambient atmosphere in shops, hotels, lobbies, clubs, restaurants, malls, casinos, spas, supermarkets, gyms ...

Maintenance and service:

The ScentDiffuser.wave requires minimal maintenance. Installation support is recommended. Service is recommended once a year. Preventive maintenance every two years.

Warranty:

1 year after installation. Usage of certified SCENTCOMMUNICATION scent cartridges is mandatory.
